III. Basic setting

In the main interface, click the "###" -"setting" icon. Setting interface is divided into four categories as "WIRELESS & NETWORKS", "DEVICE". "PERSONAL" and "SYSTEM".

3.1 Wireless & Networks

Including: Wi-Fi, Data usage, VPN, Portable hotspot and mobile networks.

3.1.1 WI-FI:

The tablet can be connected to Wi-Fi network for high-speed Internet access and download.

- ①In setting interface, turn on the Wi-Fi network, the device will search Wi-Fi networks..
- ②Choose the Wi-Fi network which you want to connect. Enter password if needed.
- "Tip.] ① If you need to rescan for available networks, tap "scan" at the top right corner. ② Click "ADD NETWORK" then enter the SSID (name) of the network. If necessary, enter password or other network configuration details and press "Save". ③By clicking "

→ "Advanced", you can do more Wi-Fi advanced Settings. ④ In Wi-Fi settings interface, press the name of the network. Touch "Forget" in the dialog that opens.

3.1.2 VPN

Add VPN network: Opens a screen that prompts you to select the type of VPN to add. You are then prompted for VPN configuration details.

3.1.3 Portable hotspot --- Apply to certain models only

①Portable Wi-Fi hotspot

Check to share your tablet's mobile network data connection as a portable Wi-Fi hotspot.

②Portable Wi-Fi hotspot settings

Open a screen with settings to turn the hotspot on and off and to set the SSID (the broadcast name) and security.

3Help

Open a dialog with information about portable Wi-Fi hotspots, as well as information about where to learn more.

3.1.4 Mobile networks

Tap Settings \rightarrow Wireless & networks \rightarrow Mobile networks to show options for roaming networks, network selection, operator selection, and access point names etc.

1)Modem power

Turn on/off the modem power.

2) Data enabled

Uncheck to prevent your tablet from transmitting data on any mobile network. This is useful if you are traveling in an area where you do not have a mobile data plan and want to avoid charges for data use on local

carriers' mobile networks. Uncheck this setting does not prevent your tablet from transmitting data on other wireless networks, such as Wi-Fi.

3) Data roaming

Uncheck to prevent your tablet from transmitting data on other carriers' mobile networks when you can't access your own carrier's mobile networks.

4) Access Point Names

(GSM mobile networks only.) Opens the APNs screen, where you can select mobile access point configurations; or touch the Menu button in the Application bar to add a new APN. Consult your carrier about how to use the tools on this screen.

5) Use only 2G networks

(GSM mobile networks only.) Check to obtain slightly better battery life, by preventing your tablet from connecting to higher-speed networks.

6) Network operators

(GSM mobile networks only) Open a screen that searches for and displays mobile networks that are compatible with your tablet. Consult your carrier to understand the billing implications of selecting another carrier.

Notice: The tablet can support 3G USB dongle to use mobile network. Or you may insert your SIM card when your tablet is with a built-in 3G module.

3.2 DEVICE

Including sound, display, storage, battery and $\mbox{\sc Apps.}$

3.2.1 Sound

Volumes: Pressing the volume will popup a setting interface, you can set music, video, games & other media volume, notifications volume and alarms volume, then press OK.

VI. Troubleshooting

6.1 The product is not normal how to do?

- ①Recommend you press the reset button or recover the factory settings after restart.
- ②After restart, does it become normal?
- ③Use travel charger to charge to activate the battery, ensure it has certain power and then restart.
- ④Professionals upgrade system.

6.2 Cannot switch on the tablet

Check the tablet's power level, please charge it before starting it. In case your tablet still cannot be switched on, you may reset it before you switch it on.

6.3 Why the standby time is too short sometimes?

The battery life will be different in different temperature environment. In terms of usage, the actual using time is also affected by increased volume, frequent operation and other factors.

6.4 Why the Tablet PC running speed fast or slow?

Due to the Tablet PC Android system software and hardware limit, or the device installed too many third-party software, memory take up much space, easily to cause the device response slow. Recommend

to uninstall the less used software to optimize system.

6.5 No sound from earphone

Check if volume is set to "0" or earphone may be broken, please change another one.

6.6 Big noise

Check if there is dust in the earphone or speaker. Check if the file is broken.

6.7 Frozen to any operation

Please use a pin to reset and then restart your tablet.

6.8 Screen drift or unresponsive screen

To correct it, you may carry out panel calibration. Go to Settings ightarrow Accessibility ightarrow Touch panel calibration to calibrate it.

6.9 Application not workable

Possible reasons may be that this app is not compatible with your OS or the downloaded .apk file is broken so you may need to download a

full version.
